

Environmental Policy

To realize our mission of “Creating Value”, we are guided by the principle of “Value-added support that enhances our customers’ growth”. Building on this principle, we aim to drive customer prosperity by creating meaningful value through our contributions to society and proactive actions against environmental challenges.

Basic Objectives

1. We recognize global environmental issues, including climate change, as one of our key management priorities and address them through a wide range of initiatives.
2. We establish environmental targets, review them regularly, and continuously implement environmental initiatives.
3. We comply with applicable environmental laws, regulations, and other requirements.

Action Guidelines

1. We work to reduce greenhouse gas emissions in each of our business activities.
2. We work to reduce environmental impacts by improving operational and sales efficiency.
3. We work to protect the environment through the effective use of resources.
